Principal, Strong Resource Group

Founded in 1988 by a group of Seacoast community members concerned about furthering engagement in the community, Leadership Seacoast is a program designed for the adult learner that creates a core awareness of community through exposure to a broad range of issues affecting the Seacoast and by presenting varied points of view on topics being studied.

Annually, Leadership Seacoast accepts a diverse group of established and emerging leaders to participate in its seven-month community leadership program. Regional issues are examined through the perspectives of experts, on-site visits, readings, discussion groups, problem-solving exercises, and other experiential activities.

Participants explore and examine key issues impacting the cultural, social, political and economic lives of Seacoast residents. Graduates of the program leave with an expanded awareness of the issues impacting the Seacoast region, a network of leaders who can support each other in building a stronger community, and a demonstration of the interconnectedness of the topics covered during the program year.
